_____ 5. Switch to the debug view to run the program. Right-click on the project's name in the **Project Navigator** pane and select Debug As -> Local C/C++ Application.

_____ 6. Click **Yes** when asked to Confirm the Perspective Switch.

_____ 7. You are now in the **Debug** view of Eclipse. Click the green arrow with the yellow vertical bar beside it near the top to run. The program will run until it finishes or a breakpoint is reached. Set breakpoints by double-clicking in the area to the left of the code. Step by clicking the button that has a yellow arrow bending down.
